

Zaplox SDK

Already have a mobile app for your hotel? That's great – we can help you make it better. Our unique open architecture development enables us to work with partners and hotel companies that already have a guest engagement app in place to take them to the next level with our powerful features and functions.

Take Your App to the Next Level

Zaplox SDK opens up the opportunity to integrate to your PMS and locks. You save time, money and resources with embedded mobile and keyless functionalities as well as value added optional services. Once guests have downloaded your enhanced mobile app, they can handle their own reservations, upgrade their room, check in, open doors using mobile keys, take advantage of customized promotions, check out and book their next stay. All in one app - your app. This solution is ideal for hotels interested in integrating Zaplox to their current mobile application environment, using our Software Development Kit.

Add mobile check in, mobile keys and mobile check out to your existing app

Zaplox apps are fully customized for both iOS and Android.

Zaplox is the market innovator leading the way in mobile key technology since 2010. We help hotels create a world-class revenue generating mobile guest journey.

KEYLESS

Can replace or co-exist with all current key card technologies

Benefit from cost savings, increased security and eliminate waste of plastic cards.

PROFITABLE

Deliver better service and personalized offers to your guests

Easily create revenue generating offers that are customizable to fit various guest segments.

SMART

Smart services all the way

Guests can access all services from one convenient app and staff is freed up to engage with guests.

Learn more about Zaplox products and how they can benefit your hotel and keep guests coming back.
